UpLeveled GmbH. / Co-founder

Email : karl@upleveled.io

PROFILE

Full-stack web developer with over 3 years of hands-on experience building scalable applications using TypeScript, React, Node.js, PostgreSQL, and MongoDB. Skilled in developing both frontend and backend features in production environments. Known for writing clean, maintainable code, collaborating in agile teams, contributing to open-source projects, and mentoring junior developers through a course program. Passionate about clean code, scalable architecture, and continuous learning.

I've been living in Austria since 2015 and successfully completed my asylum process in 2020, which finally gave me the freedom to live and work here. During those years, I dedicated myself to learning web development, teaching myself to code, building websites for friends and small businesses, and gaining hands-on experience with WordPress and Elementor, mostly without payment, just to improve my skills. In 2017, I was granted limited work rights and allowed to work only on farms, which I did, all while continuing to learn and grow as a developer in my free time. I also studied German intensively at FH Johanneum during this period. I'm now married and have three children

WORK EXPERIENCE

UpLeveled GmbH   2022 - JUNE 2025
Full-Stack Web Developer   Vienna, Austria

- Developed and maintained internal tools and production systems using React, Next.js, Node.js, and PostgreSQL.
- Designed and implemented RESTful and GraphQL APIs for data exchange between front-end and back-end systems.
- Trained and mentored junior/aspiring developers on different technologies as part of UpLeveled's full-stack immersive web development bootcamp.

Self-employed   2015 - 2021
Freelance Web Developer   Austria, Remote

- Built custom websites for individuals, small businesses, and nonprofits using WordPress and Elementor.
- Balanced freelance development work with other responsibilities, including seasonal farm work (2017–2020) due to limited work permissions.
